

Environmental policy

We want to ensure continued progress in reducing our impact on the environment, both in the company's business process by using environmentally friendly technologies, and in the design of environmentally friendly products in terms of their total operational lifetime, concluded with the disposal following the expiration date thereof.

The management and staff are committed to implementing the environmental management policy towards

- the development of environmentally friendly products and technological processes associated with the production thereof, use during the operation and the disposal of products following the expiration date thereof,
- compliance with environmental legislation,
- continuous reduction of adverse environmental impacts,
- reducing energy consumption,
- employee education and training in the responsible environmental management in their own as well as the processes within their supplier community.
- cooperation with interested public and
- responsible provision of resources for the implementation of the procedures set out therein.
